1. The following is an examiner's statement of reasons for allowance:
  - With regard to independent claims 1, 10, and 13, as the closest reference on record, Muto (JP 60-55576A) discloses a disc data reading apparatus including: an opening, a tray having a recess for receiving a disc, the recess defining a recess flange; a housing including an upper plate parallel to the tray, the upper plate having a front flange; and a cover including a first portion and a second portion, the first portion being connected to the front flange of the housing, and the second portion extending into the housing to form a barrier portion; wherein the barrier portion prevents a possible cracked disc from jetting out; **but fails to show** that the tray is moved in and apart from the housing through the opening.
  - Applicant asserts: the present invention is to provide a disc data reading apparatus for preventing ejection of a cracked disc and reducing the force caused by the cracking of the disc (Specification, p. 2).
